

According to Experian, 75% of businesses are wasting at least 14% of revenue due to poor data quality. At Pandata, we use a variety of technologies to help our clients unlock meaningful stories in their data; stories that have a direct impact on their bottom line. This leads to more efficient processes and enlightened decision-making to core functions like sales, operations and marketing.

HOW WE CAN HELP:

Identify Opportunities - Guiding your team on how to gain the most from data science, based on your unique business pains.

Leverage Data - Identifying where to find your key data. Whether you own the data or need help enriching it, we help collect the right data, at the right time.

Provide Value - Delivering access to the latest in statistics and big data software, we can turn your data into an actionable asset that removes the roadblocks to your organization's success.
